

HOOSIER VETERANS FOR MEDICAL CANNABIS, INC.

KIAs of US Service Members in Combat Since 9/11 (15 years): 6,870

Veterans Death Yearly to Overdoses: 17,520

Overdoses from Cannabis: 0

Deduction of Overdose Death in the 24 States that have Legal Medical Cannabis: Up to 40%

1 person in the US dies as a result of prescription opioids/drugs and or overdoses every 20 minutes that's 72 a day (conservable figure). The ratio of veterans to civilian 2 to 1, that's 48 to 24. In 2016 overdose death rate surpassed auto accident deaths. In the US 20 veterans a day are losing hope and committing suicide. The medications that doctors prescribe are doing more harm than good. It is proven that every day in the lives of our Veterans Cannabis is a safer and more effective at treating Post-Traumatic Stress Disorder and symptoms related to Traumatic Brain Injuries.

It's safe to say that you have a better survival rate if your government sends you off to war than if your government tries to heal you from your wounds when you return.

Join the fight with your fellow Hoosier Veterans and Citizen in bringing Legal Medical Cannabis to our Great State. This is a battle we cannot afford to lose. Sign up today and support this just cause at
